## Electrostatic Spray Technology

Electrostatic technology uses an electrical charge to allow the appropriate sanitisers and disinfectants to wrap around and evenly coat a variety of surfaces for a more complete clean.

The particles wrap around these surfaces

3D objects & hard-to-reach places are sanitised more efficiently

An electrode charges the solution at source

The charged particles are attracted to a variety of surfaces

## ELECTROSTATIC SPRAYER

The Sanique S-3i Sanitising Electric Sprayer has been designed to meet the demands that the professional first-responder sanitising contractor faces. It's delivered as a totally stand-alone unit that's ready for immediate use (the only extra is the appropriate disinfectant and a power source).

### BENEFITS

- Includes electrostatic technology
- Rapid deployment
- Tough construction copes with rigorous on-site situations
- Light weight - under 12kg for easy handling by operatives
- 15m hose ensures minimum movement of machine - set up, and it's simple to work on sanitising within the reach of the hose with only the gun in your hand
- Includes a specifically designed spray tip that ensures maximum surface coverage and fogging
- Full 24 month manufacturer's limited warranty

### PACKAGE

- 240 or 110 volt machine complete and ready to go for all sanitising procedures
- 15m hose for maximum flexibility
- 380mm (15") lance to ensure reach into those otherwise hard to-get areas
- Ergonomically designed gun to minimise hand and wrist fatigue
- Specific sanitisation spray tip to ensure correct atomisation

### SPECIFICATION

Max Hose Length	30m
Weight	11.4kg
Motor	700 watt
Product Code 240V	S3i-240
Product Code 110V	S3i-110
Limited Warranty	24 months

### Recommended Areas Of Use

**Hotels · Airports · Hospitals · Shopping Centres · Car Garages & Dealerships · Sports stadiums · Public Transport Including Buses & Trains · Offices · Industrial Premises · Educational Facilities & Many More.**
